

Installing Thinix Touch 6.3.6002 on Intel Classmate Laptop's:

The following process is optimized for the Intel Classmate Laptop's. Following this process will allow you to have Thinix Touch running in under 10 minutes with settings that are optimized for Intel Classmate devices. This process is based on the customized Intel Classmate / Thinix Touch installer version 6.3.6002.1029

OEM - Quick Installation Process:

1. Verify that the current user account has administrative rights.
2. Download Thinix Touch 6.3.6002 x86 (32 bit version) and save it to your downloads folder. This file is named: Intel_ThinixTouch_6.3.6002_Setup_x86_v1029.exe
3. Run the Custom branded Intel Classmate Thinix Touch 6.3.6002 installer:
4. Answer YES to the UAC (Windows User Account Control) prompt.

Thinix Touch 6.3.6002 - Installation Answers for Typical Intel Classmate Laptop

- a. Click or Touch **NEXT**
- b. Click or Touch **I AGREE**, then Click or Touch **NEXT**
- c. Click or Touch **NEXT**
- d. Click or Touch **CLOSE** (Touch Successfully Installed)

The Thinix OEM_Patch installer now runs automatically – (this customizes the installation for Intel Classmate devices):

- a. Click or Touch **OK** (start the OEM customization process)
- b. Click or Touch **OK** (Set Windows Background)

Thinix QuickSetup Phase:

- a. Click or Touch **Yes / No** (Run Fixup, If you have not yet installed Microsoft Office – Select No, and run Fixup.exe later)
- b. b. Click or Touch **Yes** Select yes to allow the installer to reboot the computer

Your computer will reboot.

----- This is where the OEM Setup process ends, and you will sysprep and create images -----

This process to be completed by the Intel Classmate customer. When this process is initiated, the 30-day trial period will begin. It is important to NOT do this in your master image, otherwise the 30-day trial will expire before your customers receive the software.

Intel Classmate Laptop Typical Customer Setup Process:

1. Click the link on your desktop for Thinix Touch QuickSetup:

- c. Click or Touch **Apply** (apply visual customizations)
- d. Click or Touch **OK** (Thinix Touch first run)

Notes:

1. In certain situations, the Windows background image will not change. If this occurs, browse to:
C:\Program Files\Thinix\Thinix Touch\Themes\TabletPC - Windows 7 (Navy Blue)\EN\Backgrounds
Right click the file named: Background_Default.jpg
Select 'Set as desktop background' from the explorer file menu.

An alternative is to run the application called:

C:\Program Files\Thinix\Thinix Touch\Utilities\OEM_Installer\set_background.exe

After this runs, you will normally need to logoff or reboot to see the background image which is updated.
