

# Thinix Business Center PCs & Kiosks

## Fully Managed Guest-Use PCs, Blue Collar Kiosks, & HR Kiosks

Thinix Business Center PCs are the world's leading secure guest-use computer solution. With over 100 million hours of secure uptime with no security breaches, Thinix Business Center PCs have everything your users need to stay connected, productive, and informed with access to the Internet, various applications, software, printing, and more.

### Empower Your PC Users

Our business center PCs are versatile all-in-one systems used for applications such as lobby PCs, HR kiosks, and blue collar kiosks. Our systems can be customized for a variety of environments to allow your staff to access important information such as HR benefits, vacation time and scheduling. During PC use, user data is kept secure and optimal PC operations are maintained. Security and patch management is built into every Thinix Business Center PC or kiosk at no additional charge to ensure user

privacy is safeguarded so users never have to worry about their information being at risk. With custom branding also included, Thinix Business Center PCs are artfully designed to match your brand standards.

### Main Features Include:

- Fully branded design to match your brand standards
- Built-in security integration to safeguard users with PC "lock down"
- Thinix All-Clear™ privacy protection securely deletes user history when the user's session ends
- Thinix GuestFirst™ Support for technical support needs

"I've worked with Thinix for several years and have implemented their WiFi and business center solutions into many of our upgraded and new construction hotel projects. I trust their technical recommendations and I know that I'm getting a high performance and reliable solution at a good price."
